Hi Siddhesh,

Submission #4 for your solo entry did **not pass** Phase 2 deep validation for the **Meta PyTorch Hackathon x Scaler School of Technology**, Round 1. Please fix the issue below and resubmit before the deadline.

The check that failed

❌ **Not enough tasks with graders · One or more task scores are out of range**

Why it failed

Your submission must include at least 3 tasks with graders.

Each task's score must be strictly between 0 and 1 (not 0.0 and not 1.0).

Validator log

-

How to fix it

Add (or enable) graders for at least 3 tasks, then resubmit.

Update your grader(s) so each task score falls strictly within (0, 1) and resubmit.

Why we stopped here: Phase 2 is fail-fast — checks depend on each other, so one failure stops the pipeline. Fixing this should let your next submission progress further.

Your submission
